Sanitary systems

System walls

This edition of our catalogue goes a little further than usual, offering more than just an overview of our products. In the past, we never included an editorial, nor did we include information about the sustainability of our products, our approach to the environment and our approach to business as a whole.

As a Czech-owned family business, we are part of both the wider European family and our local community. This creates an obligation for us towards society, our children and the environment. We are witnessing catastrophic events related to climate change and global warming. It is our conviction that we have a duty to stop these changes. This does not come as a novelty to us, though – sustainability has always been part of our DNA. We have a long history of investing in sustainability, with or without political pressure, because we believe it is ultimately good for everyone: for the planet, our employees, you, our customers, and our business.

The Green Deal for Europe aims to reduce EU greenhouse gas emissions by 55 percent below 1990 levels by 2030 and achieve carbon neutrality by 2050. Decarbonisation represents a major challenge for the Czech Republic. We are the third most carbon-intensive economy in the European Union per capita and the second most industrialised country in the EU. Despite that, we are moving towards our green goals. We are showing Czech industry that its transformation is possible. We started way earlier. Before it was cool. Before it became a requirement.

Simply put, Alca Group has long been aware of the impact of human behaviour on the environment and our planet. It is our undeniable advantage that we have been committed to sustainability for quite some time. Minimising the impact of our activities on the environment is second nature to us. We reduce waste. Most of our plastic waste is recycled back into production. We optimise the management of waste heat generated during the production process. In winter, we use it to heat buildings. In summer, we convert it to cold air to air-condition our manufacturing facilities. We have photovoltaic power plants on the roofs of all our manufacturing buildings. We have heat recovery units in our plant and further investments in green energy are in the pipeline.

Our products need water to work. It therefore makes sense for us to focus on using it efficiently in production and enabling our customers to do the same in their daily lives. For example, we have developed a flush valve that reduces the volume of water needed for flushing to the minimum permitted by the standard. Within the region where we operate, we invest dozens of millions of Czech crowns in the local ecosystems and in bringing water back to the landscape.

We follow the principles of circular economy. According to experts, circular measures within the EU can save at least 40 percent, some say up to two-thirds, of annual greenhouse gas emissions in key heavy industry sectors by 2050. This is a major saving. Our products are made from 100% recyclable materials. We use recycled material for packaging. We recycle up to 90 percent of all our plastic waste back into production. According to statistics, only 15 percent of plastic waste is currently recycled in EU countries. We are happy that we have a significant lead in this respect.

The issue of climate change affects us all. If we really want to make Europe the first climate-neutral continent, we all need to get involved – individuals and companies alike. We need to change our behaviour and habits and, in many areas of life, be content with less. We are proud to announce that Alca has already embarked on this path.

With respect,

 
Radka Prokopová & František Fabičovic

Czech tradition and world design is what makes us Alcadrain

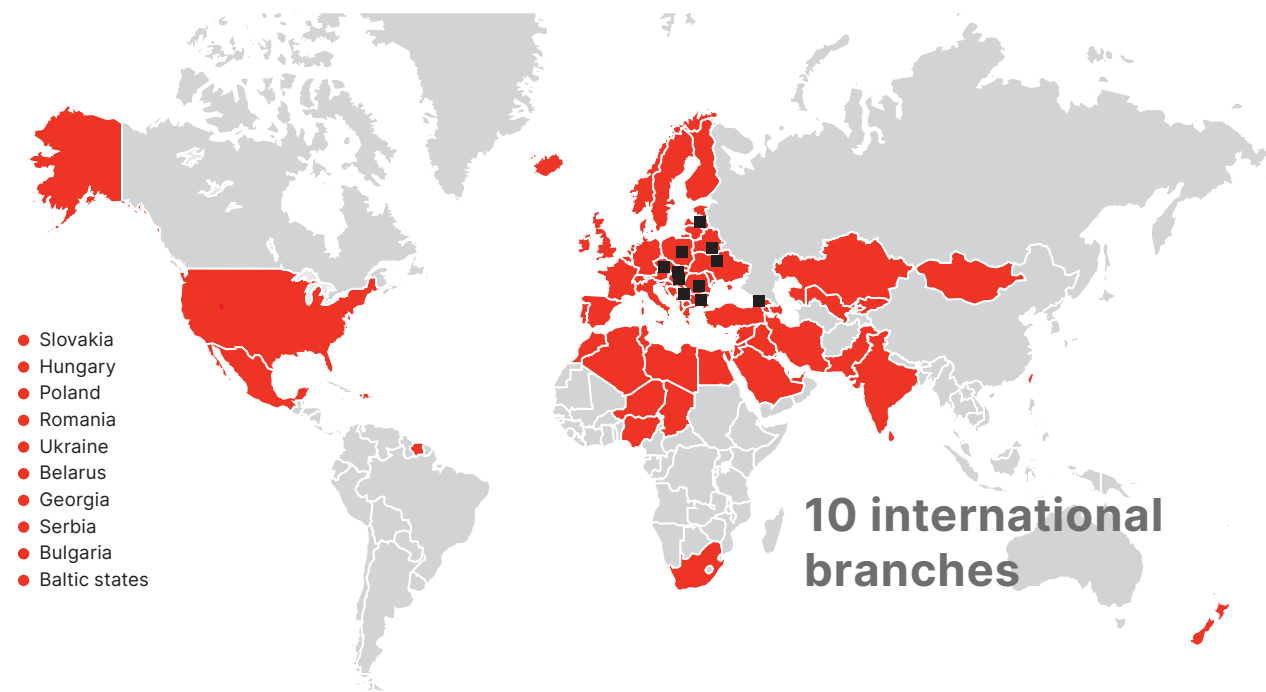

COMPANY FOUNDATION

Alcadrain company was founded in 1998 by wife and husband Radka Prokopová and František Fabičovic. Since they have started manufacturing of the first inlet and outlet valves in Břeclav, they expanded and upgraded its portfolio of products significantly. In 2022 Alcadrain became part of the Alca Group. Currently Alcadrain with its wide range of products fits into the role of market leader indicating trends on the field of sanitary systems in Central and Eastern Europe, with expansion into many other countries.

ALCADRAIN INTERNATIONAL

We design our products so that they can simplify life across many countries. Thanks to the fact that they are universal and meet demanding international standards, this is not a problem. Alcadrain distribution warehouses and sales teams in countries outside of the Czech Republic provide flexible communication and service to our customers.

CZECH PRODUCTS FROM CZECH ENGINEERS

Quality, technical solutions, innovation, design – these are the primary characteristics of Alcadrain products. High level of professionalism and skill of our Czech technicians is based on the historical tradition of Czech industry, which is over 100 years old, and renowned worldwide for its top quality products that are modern and extremely reliable.

ALCA – A PREMIUM BRAND

The premium brand ALCA incorporates a range of design products with high utility value. Alcadrain is the creator of the new trends in sanitary technology. Our cooperation with leading Czech designers in creating new product lines has won us several prestigious awards.

SHOWROOM PRAGUE

Elegance, design and innovation. These are the values of Alca Group, which are also reflected in our new showroom in Prague. On an area of 1200 m² you will find a selected product assortment of Alca Group which can be used in every project. Including all Alca sanitary technology, FV Plast piping systems and system walls Alcasystem. Come and see the first-class quality and luxury design of Alca products from a traditional Czech manufacturer. As part of the Alca Academy concept, we also organize professional trainings in the showroom, and our team is also available for individual consultations or to put together a tailor-made training for you.

WORLD DESIGN

Alcadrain indicates trends in the world of design. This is confirmed by the awards, which the company received in recent years. Prestigious iF Design Award 2018 evaluated the novelty – touch-free flush plate NIGHT LIGHT – the winner in the Product category of the Bathrooms section. Their predecessor, the collection of flush plates FLAT, was rewarded by the jury at the Red Dot Award product design competition in 2014. Not only flush plates are successful in the design competitions but also the invisible solution of outdoor drainage channel impressed the judges at the ISH fair and awarded it the Design Plus powered by ISH 2023 award.

EY Entrepreneur Of The Year in the Czech Republic
2018 Award Winner

TOP ŽENY ČESKA

BEST 100 CZECH COMPANIES

For the sixth consecutive year Alcadrain defended its position among the hundred most successful Czech companies. In 2022, Alcadrain took an excellent 41st place.

EY ENTREPRENEUR OF THE YEAR 2018

Alcadrain owners won the national round of the prestigious competition of entrepreneurs EY Entrepreneur of 2018.

TOP WOMEN OF THE CZECH REPUBLIC

The Executive Director, Radka Prokopova, has defended her previous year's victory in the businesswoman category of the prestigious 'Top women of the Czech Republic' survey. The judges evaluated the influence, performance and the business story, as well as the social contribution.

ESG – environment, social area, responsibility

WE ARE A RESPONSIBLE COMPANY

We always look to the future and strive to behave responsibly – towards the environment, our business, our customers and the community. We want to be an example for companies from our region as well as from the rest of the world. Our company culture includes an emphasis on green manufacturing, conservation, education and support of local culture, sports and charities.

WE PRODUCE MINIMAL WASTE

Our goal is clean manufacturing with minimal waste, ideally none at all. And we invest in technology that will help us achieve the goal. When designing manufacturing processes, we keep an eye on the amount of waste generated and look for ways to minimise or reuse it. We are able to recycle up to 90 percent of our waste back into production. The rest of our waste is sorted and environmentally treated by specialised companies.

WE USE ENERGY EFFICIENTLY

Manufacturing generates a large amount of waste heat. In winter, we use it to heat buildings. In summer, we convert it to cold air through our tri-generation system to air-condition our manufacturing facilities and to cool hydraulic machines. Investments in modern technology have helped us reduce our energy consumption by 60 percent. We have photovoltaic power plants on the roofs of all our manufacturing buildings, and the green electricity that we now generate covers 30% of our overall electricity consumption. Once the photovoltaic system on our new E building is put into operation, on sunny days we will be producing more energy than our plant consumes. Our electricity production is supplemented by three heat recovery units. We also use solar panels to heat water for all of our manufacturing and office buildings.

WE SAVE WATER

Water is one of the most important raw materials. Its consumption is still growing and the forecasts are alarming. According to a UN study, by 2025, two-thirds of people on the planet will live below the water scarcity threshold. It therefore makes sense for us to focus on using water efficiently in production and enabling our customers to do the same in their daily lives. Our Alca ECOLOGY system features a flush valve that reduces the volume of water needed for flushing to the minimum permitted by the standard. This saves up to a third of the water with each flush. The product received the prestigious GAIA sustainability award at the Big 5 in Dubai in 2014.

WE RECYCLE

Although our products are long-lasting and some of them will last virtually a lifetime, they are made from 100% recyclable materials. We recycle and reuse the vast majority of the plastic waste that we produce. Our products are mostly packed in recyclable materials. We always use only the minimum amount of packaging material required by the standard. And the packaging, of course, carries information on how it can be recycled. All brass waste is melted and reused in production.

WE INVEST IN LANDSCAPE RESTORATION

We are actively involved in nature conservation and the reclamation of landscapes damaged by human behaviour in the past. František Fabiřovic, Alca Group co-owner, is a co-founder and long-time supporter of the Dolní Morava Biosphere Reserve, which is part of the global UNESCO network and is considered one of the best in the world. A quarter of a century ago, the owners of Alca Group started building the Obelisk preserve. So far, they have invested around 500 million Czech crowns in it. The preserve is a unique and valued project covering 570 hectares that has helped to bring water back to the landscape. Hundreds of lost plant and animal species have reappeared in the area. 120 hectares of new forest were planted. Fourteen new pools and lakes were created on the site, covering an area of 45 hectares. Twenty-eight hectares were allocated to wetlands. Almost a fifth of the preserve is thus once again made up of water areas.

WE SUPPORT EDUCATION

We have a long-standing cooperation with schools throughout the Czech Republic and Slovakia, supporting young apprentices as well as other secondary school and university students. We provide schools with materials and tools for practical learning, organize professional training and field trips to our production plants, and offer internships and traineeships in our companies. We are a member of Inspireli Education, a global virtual faculty of architecture, which organizes the world's largest architectural competition, the Inspireli Awards. Our Alca Academy training centre trains over 3,000 professionals a year.

WE ARE FANS OF SPORTS AND CULTURE

There is always someone who needs help. We are a long-standing partner of several foundations and charities. Every year we support a number of sports clubs and cultural events, such as the Lednice-Valtice Music Festival or the Karlovy Vary International Film Festival.

Alcasystem – system walls

up to **40 %** lighter
than brick construction

- Fast and clean construction
- Low weight, high solidity
- High load-bearing capacity of the wall
- Own production and stock
- Perfectly precise and straight walls

The extended warranty of 15 years applies to the installation of the entire system Alca (including water distribution and installation frames) by a specialized company.

Alcasystem

is technical solution from one supplier for your building.

It opens up a new possibility of realization, whether it is a small project or a large construction. Acceleration of construction, sophisticated technology and cost savings.

A wall up to 4.5 meters high and arbitrarily wide can be built from three basic elements *

Even a less qualified worker without extensive construction experience can handle it. We can also assemble the pre-wall for you and deliver it to the construction site.

WC system wall will make work easier

Do majority of toilets look the same to you? Around one meter wide? We have a way to make the reconstruction more simple and faster.

We have created a unified segment from Alcasystem that you simply adapt to the bathroom, easily align, anchor in place and connect the water supply and waste.

- Quick solution
- High load-bearing capacity of the wall
- Flat wall structure – WC module in one plane with the profiles
- Universal size – possibility of extension
- Price savings due to reduced installation time
- Simple water and electricity connection

Upper set for vertical risers (AS101-SET02)

YOU HAVE TWO OPTIONS TO CHOOSE FROM

Are you renovating only the toilet? You only need to purchase the lower part of the toilet set. The upper structure serves to cover the technical riser, which is typical for apartment buildings. You simply hide the water, electricity, gas and waste distribution pipes, which are still accessible compared to brick construction.

You can buy these segments as a set, which you simply assemble using the instructions, or we deliver it to you already assembled.

Set with WC system (AS101-SET01)

ACCESSIBILITY

The system is designed to provide quick and easy installation: no special tools are required for installation.

New way of renovating block of flats housing cores

Using Alcasystem, we are able to create any model of housing core (here, for example, type B10, AA) and deliver it for construction in prefabricated blocks. They are simply assembled on site and then connected to utility networks. All this in a few moments. In addition, the entire system is very solid and at the same time light, so there is no problem with the static load of the building.

4 TYPES OF B10 CORE LAYOUTS

F T E H

For the purposes of reconstruction, it is sufficient for us to divide the housing cores into 4 basic types, marked with a letter whose shape tells us which partitions we will replace by construction from Alcasystem.

For more details contact us at alcafix@alcafix.cz

- Solution to any space
- Low weight, does not burden the building
- Acceleration of construction
- High load capacity, it can also bear a kitchen
- Prefabrication, we deliver in several segments
- Dry installation, no masonry
- Clean construction, minimal pollution

Innovation of WC systems – connector for ventilation in standard WC system

Preparation for effective and quiet ventilation with immediate elimination of unwanted odors will be now on standard products. You will then have the opportunity to decide during installation whether you will use this useful feature or not. If so, it is enough to drill a standard blind branch from the supply elbow and take the air out of the room.

NO ADDITIONAL COSTS

The extraction fan, which is connected to WC systems with ventilation, is a one-time expense. When choosing this method of extraction the customer does not have to think about any other expenses, such as charcoal filters.

SELECTED WC SYSTEMS WITH PREPARATION FOR FAN CONNECTION:

AM101/1120, AM101/1300H, AM101/1500L, AM102/1120, AM102/1120E, AM116/1120, AM116/1300H, AS101, AM120/1120, AM121/1120, AM115/1000V

AM120/1120 – WC system for your toilet with bidet function

This system is used to prepare your toilet for the connection of a bidet bowl. Whether you are already counting on it in the project, or are planning to purchase it in the future, our AM120 WC system is perfectly prepared for it.

- Concealed water and electricity supply to the toilet bowl
- Universal compatibility with various types of bidet toilet bowls
- WC tablets dispenser
- Quick and quiet water filling

ACCESSORIES

P192
Connection set for toilets or seats with bidet function

◀ The connection kit serves to connect the water and is only installed when the bowl itself is assembled. The toilet system can be used without it for a regular toilet bowl.

P193
Connection board for toilets or seats with bidet function

◀ The connection board can be used in the event that the selected bidet bowl does not have a normal water and electricity connection location. It contains an additional 13 positions where these connections can be placed, making the AM120 a universal module for most bowl models on the market.

Automatic pipe flushing through the WC system

WATER IS A LIVING ORGANISM

Some sanitary rooms, whether in a large apartment complex, a hospital or a family home, may not be used for a long time. Long-term stagnant water in the water system can then create an environment that is suitable for the multiplication of various organisms, such as legionella, which can cause serious health problems. The pre-wall installation system AM121 is made to be able to flush water systems on a regular basis and thus minimize the risk of spreading these pathogens.

FLUSH SETTING

The hot and cold water flush timer is factory set. If the settings do not suit you, you can purchase the P195 controller and set the flushing according to your requirements.

72 HOURS WC WITHOUT FLUSHING

WARM WATER RINSE
60 seconds → 6.8 l of warm water

COLD WATER RINSE
60 seconds → 6.8 l of warm water

SIMPLE CONTROL

The system can be set either with a controller or by connecting to the building control system.

FIXATION SET EASY LOCK FOR MOUNTING TO THE WALL

Even faster and easier installation
The new design allows a simple mounting to the wall in half the time.

Exact setting
Optional additional adjustment to an optimal position using an allen key accessed via the front of the frame.

CROSSBARS MOUNTING FROM THE BACK SIDE

Faster installation thanks to adjustable partitions

CROSSBAR POSITION LOCK

Fixing the position with a lock

VARIABILITY OF WASTE ELBOW DIAMETER

Waste elbow with connection to trap DN32/DN40, for waste DN40/DN50
Applies to frames A104, A105

ANCHOR FEET BRAKE

The feet lock system allows setting the necessary building height of the frame profile and then ensure its final position by tightening.

ASSEMBLY OF URINALS WITH HIDDEN CONNECTION

Just turn the larger galvanized bracket 180° and fasten it first in the order from the top.
The procedure is shown in detail in the installation manual.

Flush plates INDIVIDUAL

The individuality of each person brings with it individual demands from interior design. That is why we are introducing to the market flush plates that combine attractive colours with extremely resistant surfaces. Thus creating a luxury product in the highest possible quality, resistant to any abrasion or scratching. The flush plates design can be matched not only to the premium water taps of leading manufactures, but also to other bathroom accessories available in the INDIVIDUAL range.

Four colours in two finishes

The best-selling flush plate FLAT FUN, the holder of the Red Dot 2014 design award, is newly offered in GOLD, RED GOLD, NICKEL and GUN METAL colours in either polished or brushed stainless steel finish. Whether you opt for the elegant finish in red gold, the dazzling gold, the subtle nickel or the modern gun metal colour, all surface finishes of the FLAT INDIVIDUAL flush plates guarantee the ultimate colour fastness and an extreme scratch resistance.

The complete INDIVIDUAL range can be found on page 210.

Flush plates ANTIBACTERIAL

Selected flush plates in black-matt and white-matt finishes come with a new antibacterial surface treatment. The upper transparent varnish contains silver nanoparticles which have antibacterial properties and prevent the spread of unwanted micro-organisms on the surface of the flush plate. When you combine them with antibacterial toilet seats you can prevent the spread of bacteria in your bathroom more efficiently.

Safe environment without bacteria

The cleanliness of the toilet area is still a very important criteria when judging how people feel within it. Our unique technology in the surface treatment of selected flush plates Alca creates an impeccable film which prevents the spread of bacteria. Because of their easy maintenance, they are ideal for the use in public areas where these specially treated surfaces are desirable (hospitals, restaurants, schools).

Flush plates FLAT

New flush plate MOON
We have refreshed a range of popular metal flush plates FLAT – let us introduce the new flush plate MOON. We offer this timeless minimalist flush plate design with pleasantly rounded edges in various material versions: standard brushed aluminum alunox-matt, elegant white-polished, extravagant black-matt or brass in line with actual trends.

Flush plates touch-free

Touch-free flush plates NIGHT LIGHT, the winner of the international competition iF Design Award 2018 in the Product category of the Bathrooms section. Three design variants and sophisticated system of backlight settings and other parameters enables a unique look to any bathroom or toilet.

Barbora Škorpilová
Architect, designer and the creator of the FLAT flush plates, NIGHT LIGHT and M370 for Alcadrain, Barbora is today known for her association with the MIMOLIMIT studio which she founded in 2001.

Flush plates THIN

The flush plates THIN thanks to its flat profile stand out only five millimeters out from the tiling. They are available in three designs and seven finishes – metallic, white-polished, white-matt, chrome-polished, chrome-matt, black-matt and gold- polished. The metallic shades correspond to the Individual program.

Antibacterial surface treatment of matt flush plates

The popular flush plates THIN in white-matt and black-matt finish have a new antibacterial treatment. The upper transparent varnish contains silver nanoparticles, which have antibacterial properties and prevent the spread of unwanted micro-organisms on the surface of the flush plate.

New side fill valves

We have designed the brand new range of fill valves primarily to be fast, exceptionally resistant to impurities contained in water and to perfectly withstand a wide range of pressures 0.05–1.6 MPa (0.5–16 bar) in various countries around the world.

EASY MAINTENANCE AND FAST SERVICE
Cleaning the filter using **CLICK system** without a need of dismantling the tube

INCREASED DURABILITY AGAINST IMPURITIES
Secured by a **conical shape of the filter**

SILENT FILLING
With a **regulator** of the water flow

EXTRA FAST FILLING
Twice as fast filling without the use of a water flow regulator

NO RECOIL
Thanks to the smooth closing of the valve

LONGER LIFETIME
The fill valve is made of a material which is **more resistant against limescale**

UNIVERSAL
Designed for plastic and ceramic **WC cisterns and pre-wall installation systems**

ALWAYS THE SAME WATER LEVEL
Regardless of the water pressure in the pipes

WC seats

SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterised by its slow seat closing action. The mechanism within the hinges of the WC seat ensure a smooth and quiet closure onto the ceramics. A big advantage of this system is to protect the WC pan from damage caused by accidental dropping of the seat. It also ensures greater safety and comfort for the user when handling the seat. It is particularly suitable for public areas and for families with children.

Antibacterial

The majority of Alca toilet seats have antibacterial properties. The Antibacterial properties are achieved by the Silver compounds within the material. Testing has proven that the bacterial density on the WC seat surface is reduced.

Duroplast

Toilet seats made of high-quality Duroplast material will satisfy even the most demanding Customers. Duroplast material greatly reduces discomfort of sitting on a cold surface of a WC seat.

CLICK system for easy cleaning

CLICK system on WC seat hinges allows for easier and faster cleaning of the WC pan and seat itself. The seat is released from the pan by pressing the two buttons on the inner side of the seat hinges, allowing it to be lifted clear for cleaning. The seat is easily and quickly returned to its original position by pressing it back onto the hinges.

Setting of hinges for perfect compatibility

Easy mounting of Alca seats onto the WC pan is guaranteed thanks to the large range of possible adjustment of the seat hinges. This together with the shape of the WC seats enable them to be fitted to many types of ceramics. The hinges are made of stainless steel and are white powder paint coated to blend them into the ceramic surface, this also ensures long life and durability.

Comfortable top mounting

For Duroplast seats with CLICK system we offer an alternative to the classic bottom mounting hinges. Designed for toilet bowls with limited access the hinge system can be mounted and tightened from the top surface only, eliminating the need to gain access from below.

The integrated seat insert with magnetic holder

Duroplast seats A603 and A606 are equipped with a fully integrated infant potty seat insert. It is attached to the hinge pins and can be easily removed. The insert is made of lightweight polypropylene material so that a child can safely and simply manipulate the seat. When not use the potty seat insert is retained magnetically by the seat cover allowing normal adult use.

WC Seats with print

We also offer WC seats with color printing with three themes – flower, shell and zen.

STAINLESS STEEL

These grids have the following codes:
DESIGN – the basis is a stainless steel U-profile, with rounded edges. Two different finishes are available: polished and brushed matt.
POSH – a solid stainless steel plate is attached to the standard U-profile, with clean lines and well-defined edges. Surface finish is brushed matt.
Load class – K3.

GLASS

These grids have the following codes:
GL line – tempered glass
The grids are based on stainless steel U-profiles to which a solid piece of tempered glass is attached, available in a range of colours and with a high gloss finish. The special, toughened glass conforms to the relevant safety regulations EN 12150-2.
Load class – H15.

Shower drain APZ15 Marble

The new generation of stainless steel shower drains APZ15 is aimed especially for design fans. The water is drained by two slots in the pavement of the bathroom that hides the stainless steel shower drain without edges. The view is not optically disturbed by the stainless steel edge neither on the grid nor on the shower drain. Naturally functioning secondary drainage will ensure outflow of moisture under the pavement back into the shower drain body.

Advantages of the shower drain:

- Design shower drain is suitable for any paving thickness and for large format natural stone boards
- Water drainage is ensured by the slot in the pavement
- Uniform floor surface in the bathroom is achieved by the innovative shower drain and grid construction without edge
- The upper side of grid is covered with a special rough surface to ensure a safe bonding with the embedded tiles

APZ13 Fit and Go

Drainage channel with a grid for embedding tiles or stone

Drainage channels are suitable along facades on roof and ground terraces, in stonework greenery or walkways. The drainage system is linear with the possibility of connecting in the transverse and longitudinal direction.

- Visually clean solution for terrace drainage system
- The width of the inlet slot is only 8 mm
- Height-adjustable
- The possibility of producing atypical solutions
- Galvanized or stainless steel solution

LOCK

- The lock prevents unintentional opening of the lid, overflow of water during heavy rains
- Prevents the access of children at play
- If necessary, it is possible to remove the lock from the rain drum

BASKET FOR LEAVES AND DIRT

- Captures coarse material (mainly leaves) and prevents clogging of sewer pipes
- The narrow bottom with ribs allows a gradual fall through of rotting leaves into sewerage
- Basket can be easily removed for cleaning

MATERIAL

- PP enriched with glass fiber
- Resistant to mechanical and thermal damage
- UV stable – resistant to plastic degradation and fading
- In black or grey colours

INLET RINGS

- They are part of each package
- Diameters 80, 90, 100, 110, 125mm
- They allow the connection of all types of roof gutters and downspouts

FLAP

- Frost-free odour trap – limits the transmission of gas from canalization
- Prevents the passage of rodents from the waste
- Closes under its own weight and is secured against flooding
- Restrict splashing water from the rain drum when removing the lock case

CONSTRUCTION

- Resistant to deformation during assembly and to the load (class K3 – bearing capacity of 300kg)
- Ribbing ensures stability on the spot
- Steeper gradient of the rain drum body enables a faster and bigger water flow towards the sewer
- Flow rate 390 l/min.
- Diameter of 110mm, 125 or 125/110mm

We make products from recycled materials

We are responsible and environmentally friendly. We buy recycled plastic granules from specialist waste recycling companies and mix them with our standard granules.

- Made in the Czech Republic
- Low carbon footprint
- Zero waste production process

THREE TYPES OF PACKAGING

We are able to package products made of recycled material in three different ways. For these purposes we use biodegradable packaging or recycled LDPE foil.

YOURS IN EVERY DETAIL

Perfect match

It is possible that we can match your personal taste with charming pink tones. Or you might prefer a dazzling gold colour? Maybe your natural match is the gun metal. No matter what you decide, you can always rely on certain things. The perfect colour fastness and the resistance to abrasion. And so even your bathroom can be brought to perfection in every last detail.

Determining the lenght of ALCA bath wastes

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

Hmax + H2 = L

Maximum bathtub wall thickness for each type of bath waste and trap

Complete assortment sanitary technology and piping systems

alcadrain

Sanitary systems

Alcadrain was founded in 1998 as a family-owned Czech company under the name Alcaplast, and in 2022 it changed its name as part of the Alca Group. It is the largest manufacturer of sanitary ware in Central and Eastern Europe, producing more than 600 sanitary ware products on the area of over 60,000 m² – valves, traps, WC systems, shower drains, floor drains, toilet seats and other products.

alcapipe

Piping systems

The company FV - Plast was founded in 1990 with the aim of producing quality plastic piping systems for water distribution and heating. In 2021, it became part of the Alca Group. After more than 30 years of production, development and innovation, it now processes polyethylenes, polypropylenes and polybutylenes into many types of pipes, fittings and accessories. It is the largest manufacturer of PP-RCT pipes and fittings in Central and Eastern Europe.

alcafix

System Walls

Alcafix was established in 2022 within the Alca Group. It deals with the production of modular systems for the construction and reconstruction of bathrooms and toilets. These prefabricated walls integrate Alca's sanitary technology and piping systems and are used both in larger development projects and in the construction of family houses or reconstructions.
